TESTERS

Antifreeze & Coolant Hydrometer

03200000

- Professional tester for measuring the volume percentage of ethylene glycol contained in the cooling system
- Indicates the lowest temperature (in °C) to which the cooling system is protected

**Battery Acid Hydrometer**

03200500

- Professional tester for measuring the state of charge in lead acid batteries
- Measures specific gravity and indicates battery condition with a red / green scale

**Antifreeze Tester**

67020000

- Simple tester giving an instant read-out of coolant temperature protection range
- Indicates the % strength of ethylene based antifreeze present

**Refractometer**

03201000

This multi-purpose tool, tests Coolant, Battery Acid and Screenwash, using an Optical prism test technique.

- Coolant - tests both propylene and ethylene based anti-freeze coolant solutions, and determines the freezing point .
- Battery Acid - indicates the specific gravity of the battery electrolyte
- Screen Wash - shows the freezing point of screenwash fluids
- Freezing point shown in degrees C

Spare Parts

03201700 Spare Lens Cover for
Refractometer (03201000)

**Professional Circuit Tester**
6 - 12 - 24 volts

01490000

- Robust handle with hardened steel probe
- 1.5m heavy duty insulated rubber lead
- Uses standard automotive bulb to indicate continuity

**Circuit Tester**

67008000

- 6 - 24v tester c/w 750mm lead
